DETAILED ACTION

Status of Application

1. The remarks, amendments and declaration filed on 08/24/2010 are acknowledged.
2. Claims 8, 19, 40, 42, 50-51 and 53-54 were cancelled. Claims 1 and 57 were amended. Claims 1-7, 9-18, 20-39, 41, 43-49, 52 and 55-59 are pending and are included in the prosecution.

Continued Examination under 37 CFR 1.114

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/14/2010 has been entered.

Information Disclosure Statement

4. The information disclosure statement (IDS) filed on 07/02/2010 is acknowledged. The submission is in compliance with the provisions of 37 CFR 1.97 and 1.98. Accordingly, the examiner is considering the information disclosure statement. See attached copy of PTO-1449.

Examiner's Amendment

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

6. A new abstract is provided. The new abstract has been formulated into a single paragraph but the scope/contents therewith have not been changed/altered.

Reasons for Allowance

7. The following is an examiner's statement of reasons for allowance: Applicant amended claim 1 to delete the terms "mainly consisting of" and to include recitations of choline chloride in the form of a dry, crystalline powder and the second layer surrounding the first layer being distinct from the first layer. The declaration by Emilio Cerchiari (filed 08/24/2010) demonstrated rumen degradation resistance only by choline chloride containing granules and pellets surrounded by a double layer, i.e., an inner lipid layer and an outer carnauba wax layer, as compared to granules and pellets having a single layer of hard wax, a single layer of a mixture of hard wax and lipid, and a single layer of lipid. A further prior art search did not disclose a reference that teaches granules or particles having a core that contains choline chloride in the form of a dry, crystalline powder and where the core is surrounded by a double layer, i.e., an inner lipid layer and an outer carnauba wax layer.

Therefore, the claimed invention is novel and unobvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. Claims 1-7, 9-18, 20-39, 41, 43-49, 52 and 55-59 are allowed.
9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aradhana Sasan whose telephone number is (571) 272-9022. The examiner can normally be reached Monday to Thursday from 6:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert A. Wax, can be reached at 571-272-0623. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Abstract

A composition of matter comprising particles which contain choline chloride to be administered in a rumen-protected and post-ruinally effective form, each particle comprising a core which contains choline chloride and a protective coating surrounding the core and protecting choline chloride by ruminal activity while allowing its release into the post- rumen portion of the digestive tract of a ruminant. The core mainly consists of choline chloride in the form of a dry, crystalline powder and, in combination, the protective coating surrounding the core comprises an outer, continuous layer mainly consisting of carnauba wax and an inner, continuous layer consisting of an hydrophobic substance. A feed pellet containing the composition of matter and a premix for feed which contains the composition of matter. A premix for feed which contains feed pellets containing the composition of matter. Mash feed in unpelletted form containing the composition of matter.
